

## Profile

Computer Science and Mathematics undergraduate at HKUST. Research interests in statistical machine learning and learning theory. Currently conducting research in reinforcement learning theory under the supervision of Prof. Nian Si.

## Education

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sep 2024 – Jun 2028 | <b>Bachelor of Science in Computer Science &amp; Mathematics</b> , Hong Kong University of Science and Technology<br><i>Hong Kong</i> <ul style="list-style-type: none"><li>CGA: 3.930 / 4.3; Major GPA: 4.048 / 4.3, calculated from graded COMP and MATH coursework.</li><li>Relevant coursework: Data Structures, Computer Organization, Algorithms, Operating Systems, Linear Algebra, Probability, Multivariable Calculus, Mathematical Analysis, Game Theory, Topology, Independent Work (COMP4971D).</li></ul> |
